

Next stop: Revolution

Mind the gap.

a century's worth of technological advancements
will take place in the **next five years**

Impact of the 4th Industrial Revolution
Quadrant Strategies, July 2020

customer XP officers:

**over 50% believe they may significantly increase
the number of gig workers they use in the next five years**

The Fourth Industrial Revolution, p.14

Deloitte, 2020

when it comes to disrupting the competition, leaders are more focused on investing in technology to protect their businesses or “keep up.”

Industry 4.0 technologies' expected impact, by region

■ AMER ■ APAC ■ EMEA

Source: Deloitte Global analysis.

the shift from **growth to profitability**
necessitates the increase of **localised fintech** services.

fintech services are becoming more interconnected.

human vs robot,

or whom it's best to say 'no' to

generation Y is more **consumptive** not only to fulfill needs, but to exchange functions into an activity to **find satisfaction**.

consumptive behaviour means using incomplete products, buying goods because of gifts and buying products because many people use these products (Oktafikasari, 2017).
